PROFESSIONAL SUMMARY

Computer Science undergraduate (2028) with hands-on experience building full-stack web applications, RESTful APIs, and scalable backend services using Java, Python, JavaScript, and SQL/NoSQL databases. Proven track record in API performance optimization, asynchronous query execution, and secure authentication workflows. Adept at translating complex operational requirements into clean, modular software solutions, integrating enterprise systems, and applying core Data Structures & Algorithms to automate workflows.

EXPERIENCE

MERN Stack Intern May 2026 – Present
UptoSkills (Ai-Mentor & InternOps Projects)

- **API & Database Engineering:** Implemented server-side pagination for course enrollment endpoints to eliminate memory overhead at scale; configured `beforeUpdate` database hooks for automated data integrity.
- **Security & Account Lifecycle:** Hardened user authentication pipelines with client and server-side password validation; engineered admin account lifecycle capabilities to safely suspend accounts without data loss.
- **System Testing & Infrastructure:** Authored high-concurrency load testing scripts for AI video generation routes to benchmark system throughput; documented backend admin modules to streamline cross-functional developer onboarding.
- **UI & Feature Delivery:** Developed a modular course rating/review system and resolved persistent UI sidebar routing bugs to enhance overall platform usability.

ACHIEVEMENTS

- **Data Structures & Algorithms Proficiency:** Solved 200+ algorithmic problems across LeetCode and GeeksforGeeks, demonstrating strong computational problem-solving and optimization skills.

EDUCATION

B.Tech in Computer Science and Engineering, Gandhi Engineering College 2024 – 2028
CGPA: 8.6

Higher Secondary (PCMB), Rairangpur College (62.5%) 2021 – 2023
Matriculation, Kerala Public School (87.2%) 2021

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, C++, C
Web & Frameworks	Spring Framework, RESTful APIs, SOAP Web Services, React.js, Next.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS
Databases	SQL (PostgreSQL, MySQL), MongoDB, Relational Database Design
CS Fundamentals	Data Structures & Algorithms, Object-Oriented Design (OOD), Operating Systems, Computer Networks, Systems Integration, Unit Testing
Tools & Platforms	Git, GitHub, Postman, Linux, Docker, MongoDB Atlas, Kubernetes

PROJECTS

Ai-Park (Visitor Management & Automated Booking Platform) *Next.js, Node.js, Express, REST APIs, MongoDB*
Full-Stack Engineer Live Demo

- **Full-Stack Integration:** Co-developed an enterprise ticketing portal, automating identity verification workflows via facial recognition and secure Razorpay payment gateway API integration.
- **API Performance & Scalability:** Architected a high-throughput MERN backend with Next.js Server Actions and MongoDB Atlas, optimizing state hydration to achieve sub-second page loads for live location tracking.
- **System Architecture & Security:** Designed modular RESTful endpoints and integrated client/server validation middleware to protect sensitive transactional data and prevent double-booking collisions under high load.

CERTIFICATIONS

- **ReactJS Development** – GeeksforGeeks
- **160-Day DSA Track** – GeeksforGeeks
